## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-12, 22-24, 26 and 28-31, drawn to a laminar mat.

Group II, claim(s) 32, 33 and 38-42, drawn to a method of manufacturing a laminar mat.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Claim 1 is either obvious over or anticipated by US 3,995,984 to Fetherston et al. and US 4,065,150 to Van Auken. Accordingly, the special technical feature linking the two inventions, planar layers of similar material, does not provide a contribution over the prior art, and no single general inventive concept exists. Therefore, restriction is appropriate.

3. A telephone call was made to Roger T. Frost on April 4, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
